

Circular 9 – 2018

19 February 2018

Dear Resident

WATER PLAN – TESTING CAPACITY/FLOW

As part of our water strategy and preparing for 'day zero' we need to test the water flow on our borehole as it is part of our bigger design to initialise our water plan for the village.

It is with this in mind that we will be using our borehole to water the common area gardens over the next day or two. This will empty the tanks allowing us to measure how long it would take to refill them and assist us in planning our water storage capacity/flow rate, as discussed in earlier correspondence.

Please note that we are not relaxing of our imposed restrictions on water usage.

Please feel free to call me if you require any additional information.

Yours sincerely

Christine Dempers
Village Manager
