

Circular 15 – 2018

23 March 2018

Dear Resident

INSTALLATION OF RAIN WATER TANKS

The installation of the rainwater tanks will commence now that our water team has placed them in each home. We will start on Monday, 26 March at Unit 1 and work our way through the village. It will take a few days to complete the project.

The team, led by Roshaan Solomons, will secure each tank in the agreed location and fit the tap. Once this has been done, the tanks will be half-filled with borehole water in order to stabilise them and to make sure that they don't topple over or blow away.

The next phase will be the installation of gutter buddies and a connection to the downpipe.

Please call me if you have any queries or require additional information.

Yours sincerely

Christine Dempers
Village Manager
