

## **NATURE AND BIRDING GROUP PRESENTATION:**

Presentation by **Wim Spronk**

Evergreen Clubhouse  
29th August 2017  
17.30

*It is estimated that the whole evening will be over in about 60mins, this will include the question time.*

Wim Spronk has been making movie and videos since his days working for Standard Bank.

His interest in the natural world started very early in Amsterdam where he was born 85 years ago. The treasure trove that South Africa offered this 14-year-old inquisitive youngster got him interested in photography, the Witwatersrand Bird Club and the Johannesburg Photographic Society.

His job, hobby and passion have resulted in a fascinating life creating nature and wildlife documentaries in early days of TV in South Africa.

This presentation is divided into 5 diverse and separate DVD's and Wim will discuss and answer questions after each section.

The DVD's include interesting snippets on the role of nature and how it created the moon, how spiking water can help fishing, what you cannot see from a waterhole hide, what you can see from your window and how dangerous living in Dainfern can be.
