Dear Residents

WATER DEMAND LEVY

On the 01 July 2017 City of Johannesburg implemented a water demand management levy of R20.00. Given the scarcity of water in Johannesburg, The City of Johannesburg feels the need to further manage the effective and efficient use of water, hence the water management levy.

Furthermore, they have also done away with the free six kilolitres per month. Both these initiatives will result in a higher water account for all. On your September 2017 Levy statement you will notice these changes.

Please be aware there are still water restrictions in Johannesburg and water continues to be a scarce commodity.

If you have any queries, please do not hesitate to contact Sharon on (021) 702 3200 or sharonv@amdec.co.za.

Kind regards

Derek Drew
