

BROADACRES VILLAGE RESIDENTS COMMITTEE

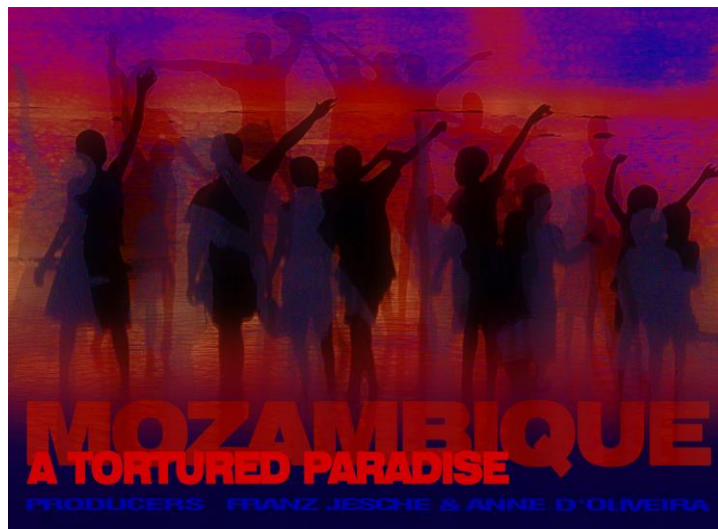

COMMUNIQUÉ - 115

Mozambique - A Tortured Paradise

8th March 2019

Dear Residents,

Mozambique is unlike anything you have ever seen or known before.

Frans Jesche and Anne d'Oliveira are presenting an audio visual on Tuesday 12th March at 18.30 for 19.00. The AV should take about 20 minutes and allowing for follow ups we expect to be finished in about 1 hour. If you wish to stay after the presentation please bring your own snacks and drinks.

They have done numerous photographic excursions together, and together they combine their images into wonderfully artistic, beautiful and creative documentaries that are absorbing and informative. They have received a number of awards for their work over the years.

The photography is spectacular and unique and as she says, "Unlike anything you have seen before". They have visited Mozambique 3 times and have travelled north up the east coast as far as Mozambique Island and on the west along Lake Malawi to about 80 kms from the Tanzanian border.

The challenge was how to combine the vast genre of images they had collected into an interesting, engaging, single audio/visual entity.

This they have managed to do by weaving together some of the country's history with images they had captured together with beauty and horror of what they saw and captured this into a compelling documentary.

After the show Anne and Frans will regale us with stories about some of the interesting tales they have to offer to elaborate on the production process and answer any questions that the audience want to ask them.
