EVERGREEN LIBRARY NEWS

Report on the Book and Coffee morning of 16 April 2019

It was a fascinating morning as Prof Mike Lecatsas introduced us to the small world of cells and viruses. His ability to explain in simple terms, the complex interaction between cells and viruses caught the imagination and interest of all. Prof Lecatsas shared with us many of the discoveries and controversies he'd been involved in; certainly, his passion and knowledge of the subject shone throughout. He also interspersed his talk with anecdotes of South Africa scientists who'd achieved prominence and Nobel prizes in this field – we can be proud of them.

NB: all residents are welcome to attend these Book Mornings. There is no membership involved and no fees – all we wish for is your interest and enthusiasm.
