

Circular 21 - 2019

19 June 2019

Dear Residents,

MEDIA RELEASE – FROM JOBURG WATER - RAND WATER MAJOR SHUTDOWN

Johannesburg Water advises all residents of the City of Johannesburg that Rand Water which is our main bulk water supplier is planning a major shutdown that will affect all our reservoirs and towers in terms of water supply for 54 hours from 24 June 2019.

Please note they have said that this does not necessarily mean that there will be no water during the 54 hours shutdown period, however, due to the extremely long hours, some of the areas may experience a shortage of water or low pressure.

Johannesburg Water appeals to all residents of the City of Johannesburg to use water sparingly during the shutdown in order to avoid a complete no-water situation and reminds all that that level 1 water restrictions are still in place.

The shutdown will also affect a number of municipalities across the Gauteng Province and they apologize for the inconvenience.

Thank you in advance of your cooperation.

Kind regards

Roy Martin
Village Manager
