

BROADACRES VILLAGE RESIDENTS COMMITTEE

COMMUNIQUE - 150

Makhonjwa Geotrail Talk

7th August 2019

Dear Residents

THE BARBERTON MAKHONJWA TRAIL

Please join us for a presentation and slide show by
Dick Townsend to discover the very first origins of
our beautiful planet Earth.

South Africa's most recently declared UNESCO
World Heritage site

Tuesday 13 August 2019

In the Clubhouse

At 10.30

SOUTH AFRICA is unmatched, not only because of its history, its culture and its people but because of its geology. The rocks beneath your feet date from more than 3 billion years ago, the infancy of our planet.

The Barberton Makhonjwa trail provides us with unique and irrefutable evidence of earth's tumultuous history of ancient meteor impacts, bits and pieces of debris from our solar system and evidence of microbe-forming deposits.
