

A NOTE

FROM EVERGREEN

Dear Resident

Borehole water irrigation project.

As I am sure a lot of you have noticed that we are finally back on track with the Borehole Irrigation project and the digging of Trenches were resumed this week.

The FSG team will be on site and will start digging trenches from where the bore hole water gets pumped to all the different Areas In the village.

Please be advised that they will start with trenches in front of unit 70 on Monday morning and plan on digging their way Up Heron road towards number 84. The plan is for them to dig approximately 25 meters per day and lay the pipe and Cover the trench before moving onto the next 25 meters the following day. This does mean that at some stage they will dig past your house and will need to dig under your drive way. When they do this, they will put metal plates down to still allow you to use your garage and access to your driveways.

Please can I ask that you bear with us as any given house should not be inconvenienced for more than one day in the process. This project will be well worth the inconvenience once we have the borehole irrigation going and just in time for spring planting and watering.

Thank you for your assistance and patience during this process of making this the village of our dreams!

Warmest Regards
