- Sunday, 3 November is National Sandwich Day

Village Housekeeping

- We have been experiencing lots of problems with water pipes being damaged with the building going on around this area. We are also delighted to announce that we are nearing the end of our borehole irrigation project and will be having the pumps connected up this week. With Rand water implementing stage 2 water restrictions, this could not have happened at a better time. We hope to start irrigation with borehole water in this week still.
- We are also pleased to announce that we have finally gotten the back up Generator linked up to certain areas in the club house to assist with emergency lighting and computers at the front desk and in the offices. Thus, we will be running when there is load shedding.

Trust you have a wonderful week in the hot weather. Our first proper summer rain is forecasted for Thursday and Friday so lets' hold thumbs we get two proper rainy days for the much-needed water.

Warm Regards
