Dear Residents

Covid19 - Residents in Isolation/ Residents Recovery

We would like to inform you that Mrs. Elizabeth Seretlo (Acacia 207) have returned home after being discharged from Hospital and have now successfully completed her isolation period. Although she is still feeling tired and not back to her usual strength, she is no longer infectious and can now see people again and have visits.

According to the Department of Health as well as the Centre of Infectious Disease, you can no longer infect others with Covid19 after completing the 14 days isolation period.

The Mackie's have also successfully completed their 14 days of isolation and are also not infectious any more despite also not being 100% better yet.

We are delighted that they are getting better and thoughts are with them that they will soon be feeling their old selves again.

Regards

Wilma Swart
Village Manager
