Greetings;

Hope all is well with you.

We are NIRIS, a radiology practice in Fourways, Cure day clinic. We are currently providing X-ray, ultrasound and interventional services at the practice.

The reason why we are writing this email is because we have realised that a lot of our elderly patients are no longer coming to the hospital for their check-ups, x-rays and ultrasounds due to the pandemic; however we fully understand their concerns hence We have come up with a solution of providing house call ultrasound services with COVID-19 protocol in place.

Ultrasound services includes:

Abdominal and pelvic ultrasound

Doppler ultrasound

Musculoskeletal ultrasound

Soft tissue ultrasound

Thyroid ultrasound

Our COVID-19 protocol is as follows:

We will be using a portable ultrasound machine that we wipe thorough, before and after every patient.

The Sonographer providing the services will be dressed in full clean PPE for every patient, this includes:

- A disposable gown
- A disposable hat
- Disposable shoe covers
- N94 mask
- A shield

We take medical aids and cash/ EFT payments.

We also charge a separate house call fee of R250.00 (not covered by the medical aid) and this will be per patient.

Hope you keep safe during this pandemic.

Thank you and hope to hear from you soon.

Kind regards

NIRIS-Neologic Imaging and Radio-Intervention Services

Dr J. Padi
