

Circular 144-2021

7 July 2021

Dear Residents,

GAS HEATERS AND GAS HOBS

For all those of you that have either a GAS HEATER or a GAS HOB - Safety is YOUR priority and it is VERY important to have your gas equipment serviced.

Yes even gas heaters and hobs need to be serviced by a qualified gas technician. This should be done at least every two years.

We have recently had two incidents in the village with gas heaters catching fire, as a precaution and for your safety, please have your gas heaters and hobs checked and serviced.

For example – things that need to be checked:

- The hoses need to be checked
- The valves that connects to the heater
- The connections on the heater valve/volume control
- The heating panels for cracks or leaks

I have arranged with the following company – **Barden The Gas Guy** – they are prepared to come to the village and service your gas heater's at a reduced price of R250.00 per heater and if you have a gas heater and a gas hob they will service both for R350.00.

The catch is... they will come to the village for a minimum of 5 residents that want their heaters serviced.

Please let me know via email or call should you wish to take up this offer.
