Christmas Message

## Christmas message from the ResCom Chair

A big thank you to all of you who contributed to the calls for the Staff Thank You, which was paid to them on 18th December 2021.

Thank you also for responding so generously to the call for Christmas presents for the underprivileged.

COVID has made 2021 a more challenging year than we had hoped, but we have still managed to enjoy a number of social activities. There is no doubt that the current COVID variant is much more transmissible than previous variants and that we all need to take note of this and exercise caution in our activities. Evergreen has followed the route of the South African government in respect of this latest wave. In other words implementing level 1 restrictions and leaving individuals to make their own decisions. Our thoughts are with those that may have contracted the disease in the current wave and are currently isolating. We wish you a speedy recovery. In the interests of all in the Village we urge anyone who tests positive to advise management of their situation and allow your name to be publicised. Awareness of the presence of the virus in the Village reinforces the message that everyone must be especially careful at this time.

Evergreen has advised us that any residents who are especially vulnerable to infection should approach the Department of Health for access to a booster jab. We encourage you to do that rather than waiting for the general booster jab being arranged for residents in the first two months of next year.

We wish you and your families a happy festive season filled with love and laughter and trust that 2022 will be a better year for all of us.
