

Circular 039-2022

26 May 2022

Dear Residents,

**GAS HEATERS AND GAS HOBS**

Yes... it is that time of year again.

**Those of you that have either a GAS HEATER or a GAS HOB - Safety is YOUR priority and it is VERY important to have your gas equipment serviced.**

Yes even gas heaters and hobs need to be serviced by a qualified gas technician. This should be done at least every 12 months.

As preventative maintenance please have your gas heaters and hobs checked and serviced.

**For example – things that need to be checked:**

- The hoses need to be checked
- The valves that connects to the heater
- The connections on the heater valve/volume control
- The heating panels for cracks or leaks

**Important Note:**

If your gas delivery guy does NOT connect your gas bottles – then call us and we will assist you to connect.

I have arranged with – **Barden The Gas Guy** – they are prepared to come to the village and service your gas heater's at a reduced price of **R250.00 per heater** and if you have **two gas heaters or a heater and a gas hob they will service both for R350.00.**

The catch is... they will come to the village for a minimum of 5 residents that want their heaters serviced.

Please let me know via email or call should you wish to take up this offer.
