

Circular 082-2022

29 September 2022

Dear Residents,

Pool Maintenance Update:

We have filled the pool and it is now available for use, please bear in mind that if we have loadshedding, this will affect the water temperature as the heat pumps are not running on the generator power.

We have not as yet found where the leak is in the pool, we have pool experts investigating and we await their feed-back.

We will keep you informed.

Thank you, patience.

Regards

Roy Martin
Assistant Village Manager
