

Circular 086-2022

05 October 2022

Dear Residents,

Pool Maintenance: Further update:

We have had the two hot water circulation pipes closed off with caps and have switched off the heat pumps to establish if this is where our leak is coming from. Unfortunately, this means that the heat pumps will not be warming the pool water to the usual 28 degrees.

Please bear with us for the next 24 hrs as we try to locate the cause of the leak. Residents are still welcome to use the pool, but we ask that you please not remove the plastic bags around the plugs that were put in.

Thank you, patience.

Regards

Wilma Swart
Village Manager
