

Circular 103-2022

15 December 2022

Dear Residents,

Swimming Pool Repairs

We have concluded repairs to the swimming pool and have filled it up with water. It will take a day for the water to get back to the 28 degrees if there is no load shedding.

Unfortunately, during load shedding the pool heat pumps do not run and this could cause the temperature of the water to drop.

But for all other purposes you are welcome to return to using the pool.

Regards

Wilma Swart
Village Manager
