

Circular 040-2023

11 May 2023

Dear Residents,

GAS HEATERS AND GAS HOBS

Yes... it is that time of year again.

Those of you that have either a GAS HEATER or a GAS HOB - Safety is YOUR priority and it is VERY important to have your gas equipment serviced.

Yes even gas heaters and hobs need to be serviced by a qualified gas technician. This should be done at least every 12 months.

As preventative maintenance please have your gas heaters and hobs checked and serviced.

For example – things that need to be checked:

- The hoses need to be checked
- The valves that connects to the heater
- The connections on the heater valve/volume control
- The heating panels for cracks or leaks
- Regulators

Important Note:

If your gas delivery guy does NOT connect your gas bottles – then call us and we will assist you to connect.

I have arranged with – **Barden The Gas Guy** – they are prepared to come to the village and service your gas heater's at a reduced price of **R350.00** for a **heater**, if you have **two gas heaters or a heater and a gas hob they will service both for an additional R100.00 per appliance.**

*The catch is... they will come to the village for a minimum of 10 residents that want their heaters
As soon as we have 10 residents or more we will set a date serviced.*

Please book with Reception - on extension 1200

Kind regards

Roy Martin
Assistant Village Manager
