

Circular 038-2024

16 April 2024

Dear Residents,

LINKING PHASE 3 SIDEWALK IRRIGATION TO THE BOREHOLE.

I am delighted to advise that work on linking the Phase 3 Sidewalk irrigation to the borehole will start on the 17th of April 2024.

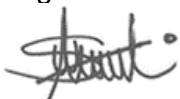

You will see the JoConstruct team on site for the next eight weeks. They will be lifting road paving and digging trenches to install the irrigation piping. The areas they are working in will be barricaded, and we ask residents to please be patient and to try and avoid these areas.

The below site plan indicates in red lines where the trenching will be done and the pipes laid. Work will commence at unit 32 and lead up in Plover Road towards the top of the Village and then go across to Heron Road and come down from house 90 to 56.

Please bear with us as this might interrupt the current irrigation schedule in the Village. Should you have any specific sidewalk irrigation concerns, you can contact Marius Viljoen who will assist you.

Regards

Wilma Swart
Village Manager
