COMMUNIQUE 22-2024

R200 SERVICE FEE CITY POWER

You would have seen the R200 service notice in the media today.

The R200 service fee specifically pertains to prepaid meters managed by City Power, a municipal electricity provider primarily serving Johannesburg. Therefore, as a direct customer of Eskom, this fee would not apply to you.

Eskom is South Africa's national electricity utility company, responsible for generating and distributing electricity across the country. It has its own billing and service structure separate from municipal providers like City Power. Therefore, customers who receive their electricity from Eskom do not incur the R200 service fee associated with City Power's prepaid meters.

Best
