

Circular 67-2024

01 August 2024

Dear Residents

VOLTANO TID ROLLOVER COMPLETED:

Voltano has confirmed that they have completed the configuration of the rollover programming of the pre-paid electricity meters.

You can now buy tokens again. A Token consists of a 20-digit code that you enter into your meter. Please take note that with your first purchase after this roll over you will receive 3 tokens (thus 3 x 20-digit codes)

You will need to insert all three sets of codes into your meter to complete the rollover and load your purchased tokens.

Should you need assistance with loading your 3 tokens, please contact reception and we will send a duty manager to assist you with loading the codes. Please make sure to have your purchased tokens on hand for Duty Managers to assist.

Warm Regards

Wilma Swart
Village Manager
