

**Circular 074-2024**

09 September 2024

Dear Residents,

**SOLAR PROJECT TEETHING PROBLEMS:**

As you might be aware we have experienced some teething problems with the solar system at night where it has twice tripped a circuit breaker instead of kicking over to Eskom Electricity.

Bright Black is aware of this and have technicians working on the system to try and determine what is causing this. Please bear with us as we endeavour to get this resolved.

Regards

**Wilma Swart**  
**Village Manager**
