

Circular: 006

28 February 2025.

Dear Residents,

UPDATE ON WATER TREATMENT PLANT SOFTENER INSTALLED:

In an effort to soften the water that Alveo provides to the Village, an additional water softener has been installed successfully this week. We have taken a water sample this morning to see the effectiveness of the softener. We should have these results back in March 2025 and will share the results with you.

To address the pressure issues, we are still occasionally experiencing in the early mornings, a bigger booster pump set has been ordered and should arrive in Johannesburg in the next week and then be installed.

This will allow us to increase the pressure up to 8 Bar to ensure the phase 3 houses does not experience any drop in pressure.

Warm Regards

Wilma Swart
Village Manager
