

Memo 02-2018

Evergreen at Lake Michelle
Northshore Drive,
Noordhoek Main Road,
Noordhoek,
7985

5 November 2018

Dear Resident,

WATER RESTRICTIONS LOWERED / APPEAL TO CURB WATER USAGE

Water restrictions and the associated tariffs have been conservatively lowered from Level 6B to Level 5 as of 1 October 2018. Capetonians have been given the go-ahead to increase their daily water usage from 50 litres to 70 litres per person, per day. The City of Cape Town is requesting that, although the daily usage has been increased, that everyone continues to be water wise.

However, water sustainability and consumption remain a challenge that we should continue to take very seriously. It seems complacency – together with the stifling conditions that have hit the Cape recently – have both driven consumptions up towards a dangerous level again. From using as little as 500 million litres a day as a city, that has now increased to 593 million litres a day.

We would like to thank those residents that are making a concerted effort to save water, we are grateful and commend you. A number of residents have totally disregarded our repeated appeals to curb their water usage and we respectfully request that they comply with the water restrictions. We kindly ask that all residents continue to save water whenever you can.

A request from the RESCOM was put forward to re-install the garden taps. Danie will be logged to attend to this over the next few days. Again, may we remind you to use this water sparingly.

Thank you for your co-operation.

Kind regards,

Kim Whitworth
Village Manager

Encl. Amended Level 5 water restriction guidelines issued by the City of Cape Town

LEVEL 5 WATER RESTRICTION GUIDELINES

The City of Cape Town has amended water restrictions to Level 5 effective from 1 October 2018 until further notice.

SUMMARY OF KEY CHANGES: LEVEL 6B to LEVEL 5

- An increase in the personal water use limit from 50 to 70 litres per person per day.
- A resetting of the overall city water usage target from 450 million to 500 million litres per day.
- A relaxation of restrictions for commercial, industrial and other non-residential water users from a 45% to a 40% usage reduction.
- A relaxation of restrictions for agricultural water users within the City from a 60% to a 50% usage reduction.
- A lowering of tariffs to Level 5 water and sanitation tariffs.

LEVEL 5 RESTRICTIONS

Restrictions applicable to all customers

- No watering/irrigation with municipal drinking water allowed. This includes watering/irrigation of gardens, vegetables, agricultural crops, sports fields, golf courses, nurseries, parks and other open spaces. Nurseries and customers involved in agricultural activities or with gardens of historical significance may apply for exemption. For more information, visit www.capetown.gov.za/thinkwater.
- The use of borehole/wellpoint water for outdoor purposes, including garden use, topping up of swimming pools and hosing down of surfaces, is strongly discouraged in order to prevent over-extraction from aquifers. Borehole/wellpoint water should rather be used for toilet flushing.
- Should borehole/wellpoint water be used for garden irrigation, this must be limited to a maximum of one hour only on Tuesdays and Saturdays before 09:00 or after 18:00.
- All City of Cape Town borehole and wellpoint users are expected to comply with all national Department of Water and Sanitation regulations pertaining to borehole/wellpoint usage, including the notice in Government Gazette No. 41381 (Vol. 631) of 12 January 2018. Borehole/wellpoint water use must be metered and all users are required to keep records and have these available for inspection.
- Permission from the national Department of Water and Sanitation is required in order to sell or buy borehole/wellpoint water.
- All boreholes and wellpoints must be registered with the City and must display the official City of Cape Town signage that is clearly visible from a public thoroughfare. Visit www.capetown.gov.za/thinkwater for details of how to register.
- All properties where alternative, non-drinking water resources are used (including rainwater harvesting, greywater, treated effluent water and spring water) must display signage to this effect that is clearly visible from a public thoroughfare. Visit www.capetown.gov.za/thinkwater for further information.
- No topping up (manual/automatic) of swimming pools with municipal drinking water is allowed.
- All private swimming pools must be fitted with a cover.
- The use of portable or any temporary play pools is prohibited.

Amended Level 5 Restriction Guidelines

- No washing of vehicles including taxis, trailers, caravans and boats with municipal drinking water allowed. These vehicles must be washed with non-drinking water or cleaned with waterless products or dry steam cleaning processes. This applies to all customers, including formal and informal car washes.
- No washing or hosing down of hard-surfaced or paved areas with municipal drinking water is allowed. Customers such as abattoirs, food processing industries, care facilities, animal shelters and other industries or facilities with special needs (health/safety related only) must apply for exemption. For more information, visit www.capetown.gov.za/thinkwater.
- The use of municipal drinking water for ornamental water fountains or water features is prohibited.
- Customers are strongly encouraged to install water-efficient parts, fittings and technologies to minimise water use at all taps, showerheads and other plumbing components.

Restrictions applicable to residential customers

- All residents are required to use no more than 70 litres of municipal drinking water per person per day in total, irrespective of whether you consume the water at home, work or elsewhere.
- Single residential properties consuming more than 10 500 litres of municipal drinking water per month will be prioritised for enforcement (see note 1). Properties where the number of occupants necessitates higher consumption are encouraged to apply for an increase in their daily water quota. For more information, visit www.capetown.gov.za/thinkwater.
- Cluster developments (flats and housing complexes) consuming more than 10 500 litres of municipal drinking water per unit per month will be prioritised for enforcement (see note 1). Cluster developments where the number of occupants necessitates higher consumption are encouraged to apply for an increase in their daily water quota. For more information, visit www.capetown.gov.za/thinkwater.
- You are encouraged to flush toilets (e.g. manually using a bucket) with greywater, rainwater or other non-drinking water.
- No increase of the indigent water allocation over and above the free 350 litres a day will be granted, unless through prior application and permission for specific events such as burial ceremonies.

Restrictions applicable to non-residential customers

- All non-residential properties (e.g. commercial and industrial properties, schools, clubs and institutions) must ensure that their monthly consumption of municipal drinking water is reduced by 40% compared to the corresponding period in 2015 (pre-drought). (See note 1 below.)
- All agricultural users within the City must ensure that their monthly consumption of municipal drinking water is reduced by 50% compared to the corresponding period in 2015 (pre-drought). (See note 1 below.)
- The operation of spray parks is prohibited.
- No new landscaping or sports fields may be established, except if irrigated only with non-drinking water.
- For users supplied with water in terms of special contracts (notarial deeds, water service intermediaries or water service providers), the stipulated contract conditions shall apply.

NOTE 1: Failure to comply will constitute an offence in terms of the City's Water By-law, 2010 (amended 2018). The accused will be liable to an admission of guilt fine and, in accordance with section 36(4), an installation of a water management device(s) at premises where the non-compliance occurs. The cost thereof will be billed to the relevant account holder. Customers

Amended Level 5 Restriction Guidelines

with good reason for higher consumption need to provide the City with motivation to justify their higher consumption.

Other restrictive measures, not detailed above, as stipulated in Schedule 1 of the Water By-law, 2010 (amended 2018) still apply. Water pressure has been reduced to limit consumption and water leaks, and as such may cause intermittent water supply disruptions.
