COVID-19 vaccination consent form

The COVID-19 vaccination will reduce the risk of a person contracting SARS-CoV-2, the virus that causes Coronavirus Disease 2019 (COVID-19). Like all medicines, no vaccine is completely effective and it takes a few weeks after the vaccine for the body to build up protection. Some people may still get COVID-19 despite having a vaccination, but this should lessen the severity of any infection.

The vaccine cannot give a person COVID-19 disease, and two doses will reduce the chance of an individual becoming seriously ill or dying. An eligible person will still need to follow the guidance in place to reduce transmission of COVID-19, such as washing hands frequently, keeping social distance and wearing a face covering when necessary.

Like all medicines, vaccines can cause side effects. Most of these are mild and short-term, and not everyone gets them.
