<b>INFORMED CONSENT FORM</b> <i>(To be read to the vaccinee by the vaccinator)</i>	
<p>The COVID-19 vaccination will reduce the chance of you suffering from COVID-19 disease. Like all medicines, no vaccine is completely effective and it takes a few weeks for your body to build up protection from the vaccine. Some people may still get COVID-19 despite having a vaccination, but this should lessen the severity of any infection.</p> <p>The vaccine cannot give you COVID-19 infection, and you have to complete the vaccination schedule for this vaccine to reduce your chance of becoming seriously ill. You will still need to follow the guidance in your workplace and public areas, including wearing the correct personal protection equipment and taking part in any screening programmes. Like all medicines, vaccines can cause side effects. Most of these are mild and short-term, and not everyone gets them. This vaccine has been authorised for use by the South African Health Products Regulatory Authority, in terms of the Medicines and Related Substances Act (Act 101 of 1965) for the active immunisation of individuals ≥18 years old for the prevention of coronavirus disease 2019 (COVID-19).</p>
