

Circular 033 – 2020 10 26

26 October 2020

Dear Resident,

### **UPDATE COVID-19**

The health and safety of our residents and staff remain a top priority within all our villages. We are extremely grateful for the sacrifices that our residents have made over the past months to support the management teams. The results are proof that our efforts and strategy has worked and thus keeping the infection rate to a minimum across all our villages.

With evidence of a resurgence of the virus in the rest of the world and in our own country and until such time as a vaccine is developed and widely available, the best defence we have against this virus is our own behaviour.

Once more I want to remind all to follow the “Golden Rules”

1. Always wear a three-ply cloth mask when leaving your home.
2. Keep a social distance of at least 2 meters when out in public, especially shopping centres and other public spaces with a high density of people.
3. Regularly wash and sanitize your hands.

We are aware that as we open our village for services that include landscaping, domestic workers, and catering staff, it comes with a possible risk of the virus spreading. Rest assured our access control and sanitizing protocols remain in place and we will enforce them with vigour.

Please remain disciplined and vigilant at all times and do not drop your guard.

Kind Regards  
Garry Reed
