

Birds

Seen in Evergreen Village Muizenberg

NOTES ON USING THIS LIST.

The first column is headed Roberts 7

A Roberts number links to the birds in Roberts Birds of Southern Africa, seventh edition. This book is not in our library.

The depth of information in Robert 7 is more than in any previous edition, and it is recognised as the reference source for Southern African birds.

Photographs to identify birds

We are unable to print photographs of all the birds seen in our village. Please use the bird books on the shelves of the Evergreen library for picture identification.

We hope to add to the bird reference books.

New birds to add to the list

As further birds are seen and identified, we will include them in this list.
