

Catering Committee report to RESCOM meeting 25th April 2023

Fedics have been with us for nearly 7 weeks now and are settling down and we are getting used to the way they do things. Nikkie our new unit manager is showing herself to be very capable and keen to raise the standard of food and service. Nikkie is also happy to help cater for residents who have specific dietary requirements if arrangements are made in advance.

The general standard and flavour of the meals served continues to be good despite the challenges with load shedding. Meals continue to be well supported and the atmosphere at mealtime remains cheerful. Friday evening fish and chips has begun again with good attendance. There are always some meals that are not to people's personal preference but they are striving to keep everyone happy.

The service at breakfast and from the a la carte menu needs some improving as the new staff is very inexperienced. Training is planned. A general increase in staff at the Bistro, that would improve the level of service, is unfortunately dependent on the financial success of the Bistro.

There are plans for a celebration of Mother's Day on Sunday 14th May more information to follow.

Our next residents Braai will be on the Saturday 20th May.
