

Gardening Report for the September Rescom Meeting.

1 Maintenance of the Sprinkler systems after being turned off during the winter months. The individual sprinkler heads in each section need to be checked. Are the maintenance team prepared to do this?

Several residents are reporting that the sprinklers in both their street side and private gardens are not yet working.

2 Spreading of mulch on the gardens has still not been completed

3 Funding of plants for the herb and Vegetable boxes.

4 The boardwalk area Drainage of the stream

Would it be possible to have the sprinklers checked and to know how often it can be watered before asking residents to contribute to some new plants for that area?
