

Gardening Report for the October: Rescom Meeting.

1. Maintenance of the Sprinkler systems: The sprinkler system for Phase 3 is now working
Thank you to Christine for arranging for residents to check their sprinkler systems and for the timetables to be available. There are individual sprinkler heads in each section that still need to be fixed. I am including a list.
2. Sprinklers on boundary walls: I have had reports from an apartment resident that the sprinklers outside the boundary wall on Sunrise Boulevard are spraying all over the road or blocked and need maintenance
3. Vegetable boxes: 2 of the vegetable boxes have now been planted
4. Public garden: Public garden on the town side of the entrance is very overgrown and needs attention weeding. There are still a few alien plants that need to be removed and mulch applied.
5. Mulching of Phase 3: This is still to be done.
 - a. Could the feeding of lawn areas still be done in October?
 - b. Could Marcus bring in some extra labour for a few days to catch up.
